

**FOR IMMEDIATE RELEASE**

## Lightstat Is Selected To Participate In Fema's NextGen Disaster Relief Housing Program

*Barkhamsted, CT - Jan 22, 2018* - Lightstat, a GSA Schedule 84 contract holder, has been down-selected through The Levy Partnership to provide heating and air conditioning control products to support FEMA's new disaster relief housing program.

VP of Special Projects, Glenn Willcox, and Government Account Executive, Travis Davidson, recently visited Hi Tech Housing in Bristol, Indiana, to help with the installation verification process of energy saving light-sensing thermostats specially designed for FEMA. "Lightstat created a customized version of our popular TG Light-sensing thermostat that will be used to control the baseboard heating units" says Travis. "This is a great example of how Lightstat continues to expand its presence in new markets with our proven energy saving technologies".
